## **Directions for Backwashing Ultima II + PSP-BioPro Filters**

1. Start to fill the pond/fountain as backwashing will remove water from the pond. (add dechlorinator when adding new water)
2. Turn Off pump before switching filter valve positions
3. Move filter valve to backwash position and allow it to run for 30 seconds.
4. Turn Off pump before switching filter valve positions
5. Move filter valve to rinse position and allow it to run for 30 seconds.
6. Turn Off pump before switching filter valve positions
7. Repeat steps 1 and 2 several times.
8. Finish on the rinse position until the water runs clear, than turn pump off and switch valve back to the filter position. Turn pump back on.
9. Refill pond to necessary level.
